Education

University of Chinese Academy of Social Sciences

2022–2026

B.A. in Sociology

GPA: 3.67/4.00; Rank: 4/31

- Advisor: Prof. Lü Peng (Director, Research Center for Private Entrepreneurs, Chinese Academy of Social Sciences)
- Key coursework: Machine Learning; Probability and Mathematical Statistics; Linear Algebra; Social Statistics; Big Data Analytics and Applications in Social Sciences; Quantitative and Qualitative Research Methods; Economic Sociology.
- Interests: Organizational consequences of AI; Digital transformation of manufacturing; computational social science.

Research Experience

Research Assistant, Humanities and Social Science Laboratory Studies

Feb. 2024–Aug. 2026

National Social Science Fund Main Project (24&ZD292)

Beijing, China

- Built a dataset of 250+ laboratories and 8,000+ scholars to examine innovation networks among humanities and social sciences labs; used network analysis to study how research organizations form, collaborate, and integrate knowledge across disciplinary and institutional boundaries in response to changes in knowledge production conditions.

Research Assistant, Social Health Governance in Megacities

Oct. 2024–Dec. 2026

National Social Science Fund Key Project (21ASH017)

Beijing, China

- Studied migraine self-management among Chinese university students through mixed methods, interviews, qualitative coding, and Normalization Process Theory, examining informal routines under limited institutional support.
- Write Chapters 1–3 of a monograph on individual, family, and community mental health risks and mechanisms; responsibilities include data analysis, qualitative interview analysis and coding, and literature reviews.

Organizer and Teaching Assistant

Aug. 2024–Jan. 2025

CASS 2024 AI Summer Camp & UCASS 2024 Fall term

Beijing, China

- Assisted in teaching “Computational Social Science Methods and AI Theory” and “Big Data Analytics and Applications in Social Sciences”; prepared course materials, coding exercises, and applied data-analysis demonstrations.

AI Entrepreneurship

Product and Business Lead, Startup Portfolio

Mar. 2025–Present

- Lead a 5-member engineering team working on applied AI systems for business clients, from problem definition and client discovery to system design, development coordination, and deployment testing.

Technical projects:

ML-Driven B2B Platform for Amusement

Mar. 2025–Present

- Developed an ML-assisted design and procurement platform with Zhongshan Golden Dragon Group for overseas amusement projects. The system combines historical project cases, site constraints, layout preferences, and market requirements to recommend site-adapted project configurations, reducing the cross-border design and contract signing cycle from roughly two months to under one month.

LLM-Assisted ERP System for Cross-Border E-Commerce

Dec. 2025–Present

- Built an internal LLM-assisted ERP system serving 10 overseas-facing e-commerce firms, with continuous sales monitoring, operational issue detection, inventory-risk forecasting, and automated SKU operations. Designed the workflow around approval-based actions, allowing the system to identify operational problems and recommend or execute actions while retaining human review for consequential decisions.

Publications and Conference

- Lin, H.^{*}, & Liu, L.^{*†} (2026). Analysis on the normalization process of migraine management among college students. *Medicine and Society*, 39(8), 79–86. <https://doi.org/10.13723/j.yxysh.2026.08.011>
- Liu, L. & Lü, P. (2026). *Reorganizing knowledge production: The forms of humanities and social sciences labs in the United States*. Paper presented at the Annual Conference of the Chinese Sociological Association, Sociology of Technology.
- Lü, P., Liu, L., & Liu, J. (2025). *Local translation of state will through digital governance data: A study based 14,850 village regulations*. Paper presented at the 6th Chinese National Forum on Computational Social Science.

Awards

- China Ministry of Human Resources and Social Security advanced training - National Program of Professional and Technical Talents, “Frontiers in Social Computing and Digital Society,” 2024.
- 10th China Social Survey - Outstanding Worker: developed science and health literacy instruments and implemented digital item banks for reproducible questionnaire design process.
- Outstanding Graduate Award, UCASS, 2026; Academic Scholarship, 2nd class (2024–2025) and 3rd class (2022–2024).

Technical Skills

- Machine learning; Natural language processing; Causal inference; Network analysis; Agent-based modeling.
